

SOC 2 Type II Compliance & Audit Statement

Trust Services Criteria: This report evaluates the controls implemented by the organization related to Security, Availability, and Confidentiality.

Access Reviews: User access privileges are audited quarterly. Non-active accounts are deactivated within 90 days of inactivity.

Vulnerability Scanning: Automated external vulnerability scans are executed weekly. Critical issues must be patched within 14 days.

Physical Security: Data centers are hosted in ISO 27001 certified facilities with biometric access controls and 24/7 video monitoring.
