

RESTRICTED: Long-Term Financial Forecast 2027

This document contains high-level strategic projections for the 2027 fiscal year. All information is strictly proprietary and restricted to Finance leadership.

Target Revenue: Our goal is to achieve \$75 million in annual revenue by end of 2027, driven by our new cloud intelligence platform expansion.

Projected Headcount Growth: We anticipate increasing the engineering team by 45% and the sales team by 30% to support scaling requirements.

Strategic M&A: We have allocated \$8 million for the acquisition of boutique data science firms to expand our model capabilities.
